# Coco Coir Growbags

- *Growbags are coco coir compressed slabs, wrapped by a polyethylene white/black bag.*
- *Available dimensions are from 8 cm up to 16 cm high and from 10 cm up to 40 cm wide. The length is up to 120 cm.*
- *Planting and drainage holes can be ordered in advance or easily made at the plot.*
- *Coco coir growbags enable the grower full control over the crop*
- *Coco Coir grow bags are easy to handle in the greenhouse and are used as a complete growing system.*

# Coco Coir Grow Slab

- *Grow Slabs are compressed coco coir slabs which are used in designated containers, trances in soil or just by laying them on the ground.*
- *Grow Slabs are the easiest solution when growers has their own troughs.*
- *Grow Slabs are also popular as better growing environment substrate in the soil, enabling the roots easy establishment in the growing row.*

# Bales

*Bales are available as regular, washed and treated the material. The coco coir is compressed into 5 kg bales, 30X30X10 cm (~ 9 liters when compressed).After hydration of the bales (adding water to the compressed bale), the yield for each bale should be 65-70 liter of loose coco coir.*

SUITABLE CROP	BLENDS	EC (1:1.5)	AVAILABLE SIZE
Tomato Cucumber Bell-pepper Strawberries Cut Flowers MMJ	16mm PLF Hydro Pro Blends	Naturally Washed Washed Treated	30X30X10-14

# Open Tops

- *Open Top is a white and black plastic bag (black interior, white exterior) filled with coconut fiber substrate.*
- *The plastic bag is good for at least two years of use and is a more effective solution than pots or black plastic bags.*
- *Coconut fiber (Coconut Peat) is well known for promoting root development.*
- *The ability to produce a healthy root system in the shortest possible time is of great importance to any grower.*

# Coco Peat Mixtures

*Our bulk substrate is manufactured in our factory in Murcia, Spain. Compressed coir arrives from our factories in Sri Lanka and India and is then processed in a special production line and packed into bulk coir. We offer pure coconut in bulk and mixes with peat moss packaged in 70 liter bags, 3m3 bales and special semi-compressed giant 5m3 bales.*
